

Acoustic Imaging Audits

Your first line of defense against downtime

Partial Discharge Detection

Identify electrical faults before they escalate

- Detects early-stage partial discharge activity in MV & LV switchgear and high-voltage equipment
- Visual reporting helps you take action with confidence

Mechanical Inspection

Keep systems running safely

- Contactless scanning of large areas of conveyor systems
- Detect mechanical faults early
- Obtain clear visual and acoustic reports for faster decision-making

Leak Detection

Stop leaks, save energy

- Locate leaks in compressed air, gas, steam & vacuum systems
- Obtain sound maps for efficient, targeted repair
- Reduce energy waste and support sustainability goals

Take an active approach to industrial maintenance

✓ Proactive Maintenance

✓ Enhanced Reliability

✓ IEC Compliance

✓ Cost Savings
